**Series' differences:** No changes

### VALUES AND FORMAT

1 - 999999.99      Income (national currency)  
0                      No income

### FLAGS

Type of variable	Flag name	Flag comp.	Type of information	Values	Modality label
Income variable	_F	<i>Two-digit flag: first digit</i>	Most common source or method	1	Collected via survey/interview
				2	Collected from administrative data
				3	Deductive/logical imputation (also including top- and bottom-coding)
				4	Gross/net conversion
				5	Model-based imputation
				6	Donor imputation
				7	Not possible to establish the most common source or method
		<i>Two-digit flag: second digit</i>	Type of collected value	1	Net of tax on income at source and social contributions
				2	Net of tax on income at source
				3	Net of social contributions
				4	Mix of different nets
				5	Gross
				6	Income component(s) not taxed
				7	Mix of net and gross
	8	Unknown			
	9	Not applicable (the value was not collected)			
	_IF	Imputation factor = collected value / recorded value *100		- 999999.99- 999999.99	Collected value / Recorded value *100
				.	If problem of dividing by 0 appears

### DESCRIPTION

Gross means that neither taxes nor social contributions have been deducted at source. The net income component corresponds to the gross income component but the tax at source, the social insurance contributions, or both, are deducted.

If the gross value is a conversion from the net, the corresponding net variables should also be filled. If both net and gross values are collected, both should be recorded.
