

**Description of flags**

This income source uses two-digit flags. The first digit expresses '*most common source or method*' and the second digit expresses '*type of collected value*'.

The imputation factor shows what percentage of a recorded (transmitted) value is collected and what percentage is imputed, it can be negative and is expressed as a number with two decimal places.

Suggested question:

*During last year (income reference period) did you receive family - or children - related allowances from the government (central or local)?*

*If your answer is 'Yes', please write down the total amount \_\_\_\_\_ in national currency.*
