

# Descriptive report of HH091

## Description

**Short Description:** Indoor flushing toilet for sole use of the household (OPTIONAL)

**Long Description:** Indicates whether the household has access to an indoor toilet with a flushing system, either exclusive or shared, within the dwelling. This variable helps monitor basic housing amenities and living standards. It is optional, meaning that reporting may vary by country, and it's typically used as part of the EU's social inclusion and material deprivation indicators.
