|----|-------------------------------|
| 1 | Filled |
| -1 | Missing |
| -7 | Not applicable (PB010 < 2021) |

DESCRIPTION

The variable is a core social variable.

The variable describes whether an individual is living with a partner.

The categories for the variable describe whether a person is living with a partner in the same household. A 'partner' can be defined according to the legal (husband or wife or civil partner) or *de facto* (partner or cohabitee) relationship status.

The variable 'partners living in the same household' can be derived from the household grid.

Based on his or her partnership/relationship status – legal or *de facto* – a person is considered to be living with a partner when sharing the same usual residence. In other words, a person who has a partner living in a different household (persons living apart together) should be classified as 'person not living with a legal or *de facto* partner'. Accordingly, one-person households are also classified as 'person not living with a legal or *de facto* partner'.

A person is considered to be a member of the household when having his or her usual residence (see appendix) in the household.

In the cases when a separate question is used to get the information on whether a person is living or not with a (legal or *de facto*) partner, the recommended question is the following:

"Are you living with a partner in the same household?"

The wording of the question may be adapted so that the different cases of partner relationships – legal (husband/wife/civil partner) or *de facto* (partner/cohabitee) – can be covered.
