DESCRIPTION

Marital status is the conjugal status of each individual in relation to the marriage laws of the country (i.e., *de jure* status). It therefore does not necessarily correspond with the actual situation of the household in terms of co-habitation, arrangements, etc.

Some countries have a legal framework for registering partnerships. Such information must also be treated in the same way, and it is proposed to treat them as married and to classify them under code 2 when the partnership still exists. Otherwise, code 3-5 should be used (legal separation or death of one of the partners and so on).
