

# Descriptive report of DB062

## Description

**Short Description:** Secondary sampling units [SSU]

**Long Description:** The variable DB062 provides identification codes for selected Secondary Sampling Units (SSUs) when a multi-stage sampling design is used. Multi-stage sampling is employed when direct element sampling is not feasible or is too costly. In this method, Primary Sampling Units (PSUs) are selected first, followed by the selection of SSUs within the chosen PSUs.
