Total gross household income (HY010) is computed as sum of all gross personal income of all household members collected in the individual part plus gross income components collected for each household.

The sum for all household members of gross personal income components

- Gross employee cash or near cash employee income (PY010G),
- Company car (PY021G),
- Gross cash benefits or losses from self-employment (including royalties) (PY050G),
- Pensions received from individual private plans (other than those covered under ESSPROS) (PY080G),
- Unemployment benefits (PY090G),
- Old-age benefits (PY100G),
- Survivor' benefits (PY110G),
- Sickness benefits (PY120G),
- Disability benefits (PY130G),
- Education-related allowances (PY140G);

Plus gross income components at household level

- Income from rental of a property or land (HY040G),
- Family/children-related allowances (HY050G),
- Social exclusion not elsewhere classified (HY060G),
- Housing allowances (HY070G),
- Regular inter-household cash transfers received (HY080G),
- Interests, dividends, profit from capital investments in unincorporated business (HY090G),
- Income received by people aged under 16 (HY110G));

That means:

HY010 = HY040G + HY050G + HY060G + HY070G + HY080G + HY090G + HY110G + [for all household members] (PY010G + PY021G + PY050G + PY080G + PY090G + PY100G + PY110G + PY120G + PY130G + PY140G).

The non-monetary income components, as well as interest paid on mortgage and employers' social insurance contributions, with the exception of the company car and the pensions received from individual private plans (other than those covered under ESSPROS) are not included in the computation of the aggregated income variables and in the computation of the EU indicators (OMC[39] indicators). However, these components have to be recorded at component level in their respective codes, i.e. PY020G, PY030G, HY170G, and HY100G.

Description of flags

This income source uses two-digit flags and missing is not allowed. The main source should be defined as it is explained in the section of the flags.

In case two-digit flags are used, the first digit express '*most common source or method*' and the second digit express '*type of collected value'*. The flags for all incomes constructing the HY010 need to be defined before the construction of the flag for HY010.
