				3	Deductive/logical imputation (also including top- and bottom-coding)
				4	Gross/net conversion
				5	Model-based imputation
				6	Donor imputation
				7	Not possible to establish the most common source or method
		Two-digit flag: second digit	Type of collected value	1	Net of tax on income at source and social contributions
				2	Net of tax on income at source
				3	Net of social contributions
				4	Mix of different nets
				5	Gross
				6	Income component(s) not taxed
				7	Mix of net and gross
				8	Unknown
				9	Not applicable (the value was not collected)
	_IF	Imputation factor = collected value / recorded value *100		-999999.99-999999.99	Collected value / Recorded value *100
				.	If problem of dividing by 0 appears

DESCRIPTION

This variable refers to all regular monetary transfers paid to other households, during the income reference period, including payments that happen only once per year, but every year should also be considered. For example, payments done to children that are studying away from the household and are **not a household member** should be included here.

Inter-household transfers should be:
