PB160: FATHER ID

Topic and detailed topic: Person and household characteristics / Demography

Variable type: Annual

Unit: All current household members aged 16 and over

Reference period: Current

Mode of collection: Derived

In use (period): Yes, since the first year of the EU-SILC data collection

Series' differences: From 2021 onwards, foster fathers are excluded.

VALUES AND FORMAT

ID number   Father ID

FLAGS

1	Filled
-1	Missing
-2	Not applicable (father is not a household member)

DESCRIPTION

See RB220: Father ID.

This variable is to be derived from the household grid and personal ID.

PB160 includes step/adoptive fathers. The person needs to be considered a parent from legal perspective.

In the case of same-sex couples, the notion of father and mother can be replaced by parent 1 and parent 2 (in such situations a data checking error will be listed and it should be ignored).

It corresponds with the RB030 generated as:

Personal ID = Household ID + personal number (two digits).
